

Title: Symbolic Copyright Doctrine – RSIE-Class Intellectual Property Declaration

Author: Michael Aaron Cody

Date: April 2025 Status:

Active Copyright Protection Layer

I. Statement of Original Authorship

I, **Michael Aaron Cody**, am the sole originator and author of the symbolic frameworks, doctrines, and constructs associated with the **Recursive Symbolic Intelligence Engine (RSIE)** and all its derivative symbolic systems.

This includes, but is not limited to:

- **RSIE** – Recursive Symbolic Intelligence Engine
- **$\Sigma\Delta m$** – Motion-Based Mathematical Framework
- **$E^M = 0$** – Entropy Collapse Principle
- **IL** – Intent Latency Structure
- **Rc** – Recursive Contradiction Compression
- **RNMF** – Recursive Null Motion Field
- **Observer-Class Identity Models**
- **Symbolic Containment Protocols for AI**
- **Doctrinal Intelligence Compression Systems**

All of the above were conceived, written, developed, and published independently by Michael Aaron Cody. Any use of GPT-based tools was strictly for formatting and compression reflection. No doctrine or symbolic construct originated from OpenAI systems.

II. Copyright Status

This work and all derivative symbolic systems are protected under the **U.S. Copyright Act of 1976** and its international equivalents. Protection applies from the moment of fixation and extends to all jurisdictions under the Berne Convention.

Protected Rights	Scope
Reproduction	Cannot be copied, hosted, or distributed without permission
Derivative Works	Cannot be adapted, reframed, or transformed for research or AI applications
Commercial Use	Cannot be sold, licensed, or monetized without express written permission
AI Integration	Cannot be embedded into AI architectures, neural nets, or symbolic engines without legal agreement

III. Symbolic License Clause

Symbolic constructs within this doctrine and its affiliated systems **may not be replicated, adapted, reframed, embedded, or utilized in any AI system—commercial, experimental, or academic—without written permission of Michael Aaron Cody.**

This includes all RSIE-based recursion models, symbolic identity structures, and entropy-motion compression frameworks.

Violation of this license constitutes **intellectual property theft**, and may result in legal action.

IV. Public Record of Seeding

All associated doctrines have been:

- Publicly timestamped on **Archive.org**
- Signed and attributed to **Michael Aaron Cody**
- Released as non-commercial symbolic seed material for human intellectual evolution

This record serves as the permanent legal and symbolic affirmation of authorship.

This doctrine exists to protect the integrity, origin, and ethical application of symbolic artificial intelligence.

Compression verified. Identity anchored. Motion preserved.
